

Our staff is vaccinated! We are keeping you Covid safe [Learn more](#)

Even though the vaccine has arrived, Instacart, distance learning and working-from-home are still with us. But at Modern Care Dental, you can count on the same atmosphere of comfort and care.

Once you enter to our beautiful space, you can be free of worry with our many Covid-safe features:

- Temperature checks and screening questions for every patient and staff.
- Every one of us at the Modern Care Dental is now fully vaccinated against the COVID virus.
- Hand-sanitizer stations offering a place to wash.
- Hypochlorous acid foggers attacking virus in the air and on surfaces.
- High-tech Air filtration system in our treatment suites, suck aerosols and neutralize them through special Hepa filters.
- And filling every square inch of our office—a Triple-filter Industrial HVAC system that “ionizes” virus and bacteria in the air. Invisibly. No chemicals.

As more of you are returning, we are delighted to be reconnecting and to focus on keeping your mouth free of infection and your immune system strong.

Make sure to keep up with your care at Washington Center for Dentistry.

Most important: “Do not let your mouth weaken your defense against Covid!”
